

Professional Summary

Software Engineer with 1.2 years of hands-on experience in full stack web development. Strong expertise in JavaScript (ES6+), React.js, Node.js, Express.js, SQL, MongoDB, and Tailwind CSS. Experienced in building and consuming REST APIs, developing scalable backend systems, and working in agile environments. Familiar with Git, clean coding practices, and basic unit testing. Passionate about delivering high quality, maintainable web applications and continuously learning new technologies.

Skills

- **Languages:** JavaScript (ES6+)
- **Frontend:** HTML, CSS, Tailwind CSS, React.js, Next.js, SvelteKit
- **Backend:** Node.js, Express.js, REST APIs, Middleware
- **Databases:** MongoDB, MS SQL
- **Tools:** Git, GitHub, MS Excel, Cursor AI, Claude, V0
- **Other Skills:** Communication, Requirement Gathering, People Management

Experience

Software Engineer Jan 2025 – Feb 2026

Legacies Techno Pvt Ltd – Chennai

- Built full stack features using React, Next.js, Node.js, and Express.js for enterprise-level applications.
- Developed and optimized REST APIs and database workflows using MongoDB and MS SQL Server.
- Integrated IoT devices (Arduino, ESP32, MQTT) with real-time dashboards for factory automation.
- Handled client calls and requirement discussions, translating business requirements into technical solutions and providing development updates.

Projects

Fidelity National Financial – Title Plant Builder (TPB)

Tech Stack: SvelteKit, Node.js, Express.js, MS SQL

- Developed data processing and validation workflows using Node.js, Express.js, and Sequelize with MS SQL Server, including OCR pipelines powered by Azure OCR and Tesseract.js.
- Built responsive, component-driven UI modules with SvelteKit, Flowbite Svelte, and Tailwind CSS for document classification, cross-referencing, and property record visualization.
- Designed relational database models in MS SQL Server to manage county property records, indexing structures, and automated validation rules.

Factory Tool – IoT Monitoring & Automation System

Tech Stack: React.js, Node.js, Express.js, MongoDB, MQTT

- Integrated sensors (air quality, vibration, sound, card readers) using MQTT based communication.
- Developed real-time dashboards for monitoring device data. Implemented automated machine shutdown logic based on sensor thresholds.
- Built employee management and machine analytics modules. Optimized IoT data handling with secure backend APIs.

Education

Bachelor of Mechanical Engineering

Jul 2014 – May 2018

PSV College of Engineering And Technology, Krishnagiri
