

KALAIYARASAN A

Full Stack (MERN) Developer | React.js | Node.js

+91 9629010742 | kalaikabil6464@gmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 2.2 years of proven experience building end-to-end web applications from database design to responsive UI. Deep expertise across the full JavaScript (ES6+) ecosystem — React.js, Next.js, Node.js, Express.js, MongoDB, and MS SQL Server. Skilled in architecting REST APIs, implementing OCR pipelines, and delivering real-time IoT dashboards. Strong communicator with experience managing client relationships and leading cross-functional delivery in agile teams.

TECHNICAL SKILLS

- Languages:** JavaScript (ES6+)
- Frontend:** React.js, Next.js, SvelteKit, HTML5, CSS3, Tailwind CSS, Flowbite Svelte
- Backend:** Node.js, Express.js, REST API integration, AWS (EC2, S3), Authentication (JWT), Context API / Redux
- Databases:** MongoDB (NoSQL), MS SQL Server, PostgreSQL
- Integrations:** Azure OCR, Tesseract.js, MQTT, Arduino, ESP32, IoT Sensor Pipelines
- Dev Tools:** Git, GitHub, Claude AI, Cursor AI, VS Code, CI/CD, Context API, Redux (basic)
- Soft Skills:** Client Communication, Requirement Gathering, People Management, Collaborated & Guided

PROFESSIONAL EXPERIENCE

Software Engineer

Jan 2024 – Feb 2026

Legacies Techno Pvt Ltd — Chennai, India

- Delivered full-stack features end-to-end — from database schema to pixel-perfect UI — using React.js, Next.js, Node.js, and Express.js.
- Built and maintained REST APIs consumed by multiple frontend clients, applying middleware for authentication and error handling.
- Optimized complex SQL and MongoDB queries, cutting data retrieval times by up to 25% for high-volume workflows.
- Integrated IoT sensor data streams via MQTT into a Node.js backend powering real-time React.js dashboards.
- Developed scalable full-stack applications handling high-volume data and optimized API performance for production use.
- Designed modular backend services following microservices principles. Built scalable REST APIs with loosely coupled architecture

PROJECTS

Fidelity National Financial — Title Plant Builder (TPB)

TechStack: SvelteKit · Node.js · Express.js · MSSQL · Sequelize · Azure OCR · Tesseract.js

- Architected a full-stack OCR document pipeline using Node.js, Azure OCR, and Tesseract.js, automating property record classification.
- Developed a responsive SvelteKit UI with Tailwind CSS for document cross-referencing and visualization workflows.
- Designed and implemented relational MS SQL Server schemas with automated validation rules for county title-plant data.
- Deployed Sequelize ORM for type-safe database interactions, improving data integrity and reducing raw SQL errors.

Factory Tool — IoT Monitoring & Automation System

TechStack: React.js · Node.js · Express.js · MongoDB · MQTT · Arduino · ESP32

- Built real-time event-driven pipeline using MQTT → Node.js → MongoDB for low-latency data processing
- Implemented configurable threshold-based machine shutdown logic, improving factory safety compliance.
- Created analytics dashboards for machine performance and employee management backed by optimized API endpoints.
- Built reusable React components using Hooks, Context API, and optimized rendering techniques

EDUCATION

Bachelor of Engineering — Mechanical

Jul 2014 – May 2018

PSV College of Engineering and Technology, Krishnagiri

LANGUAGES

English, Tamil, Telugu
