KALAIYARASAN A

Full Stack(MERN) Developer | React Js | Node Js

kalaikabil6464@gmail.com | +91 9629010742 | https://linkedin.com/in/kalai64 | https://portpolio-1.vercel.app/ | https://github.com/kalai64

Bengaluru, India

PROFESSIONAL SUMMARY

Full Stack(MERN) Developer with 2.5+ years of experience building scalable web applications using React.js, Next.js, Node.js, Express.js, MongoDB, and SQL Server. Experienced in designing RESTful APIs, optimizing database performance, and integrating IoT (MQTT), OCR (Azure OCR, Tesseract.js), and Generative AI solutions. Delivered production-ready applications for enterprise clients and translated business requirements into technical solutions.

TECHNICAL SKILLS

Languages: JavaScript (ES6+)
Frontend: React.js, Next.js, SvelteKit, HTML5, CSS3, Tailwind CSS, Redux, React Hooks
Backend: Node.js, Express.js, REST API Development, JWT Authentication, JSON
Databases: MongoDB (NoSQL), MS SQL Server, PostgreSQL
Integrations: Azure, Tesseract.js, MQTT, Arduino, ESP32, IoT
Dev Tools: Git, GitHub, Claude AI, Cursor AI, CI/CD pipelines, Agile Methodology, Generative AI
Soft Skills: Client Communication, Requirement Gathering, Team Collaboration

PROFESSIONAL EXPERIENCE

Software Engineer — Legacies Techno Pvt Ltd — Chennai, India ***Apr 2024 – Oct 2026***

- Developed and deployed full-stack web applications using React.js, Next.js, Node.js, Express.js, MongoDB, and SQL Server.
- Designed and maintained RESTful APIs with JWT authentication, middleware architecture, and centralized error handling, improving application reliability and security.
- Optimized MongoDB and SQL queries, reducing data retrieval time by up to 25% and improving application responsiveness.
- Integrated MQTT-based IoT sensor pipelines with Node.js backend services to enable real-time monitoring and analytics dashboards.
- Built reusable React components and implemented state management using React Hooks and Redux, improving code maintainability and development speed.
- Collaborated directly with clients to gather requirements, define technical specifications, and deliver features within sprint timelines.
- Participated in Git-based version control workflows, code reviews, debugging, functional testing, API Testing, and deployment activities.

PROJECTS

Fidelity National Financial — Title Plant Builder (TPB)

Tech Stack: SvelteKit · Node.js · Express.js · MS SQL Server · Sequelize · Azure OCR · Tesseract.js

- Built an OCR document-processing pipeline using Azure OCR and Tesseract.js, reducing manual classification effort by 20% and processing 1000+ documents.
- Developed responsive SvelteKit and Tailwind CSS interfaces for document search, validation, and cross-referencing.
- Designed MS SQL Server schemas with validation rules to ensure data accuracy and consistency.
- Implemented Sequelize ORM, reducing SQL-related errors and improving development productivity.

Factory Tool — IoT Monitoring & Automation System

Tech Stack: React.js · Node.js · Express.js · MongoDB · MQTT · Arduino · ESP32

- Built an end-to-end IoT platform integrating MQTT, Arduino, ESP32, Node.js, MongoDB, and React.js.
- Developed real-time dashboards for machine performance, employee monitoring, and operational analytics, handling 1,000+ sensor readings per day.
- Created scalable APIs for processing and visualizing high-volume sensor data.
- Built reusable React components with Hooks (useState, useEffect) and optimized rendering performance.

EDUCATION

Bachelor of Engineering — Mechanical, PSV College of Engineering and Technology, Krishnagiri ***Jul 2014 – May 2018***

LANGUAGES

English, Tamil, Telugu
